Work Experience

Frisidea Tech – Jakarta, indonesia

Full-stack Web Developer Intern

(September 2024 – December 2024)

- Developed a career page web application from scratch, including frontend, backend, and admin panel, using Vue.js, Tailwind CSS, and Laravel 11, then deployed it to a live domain: <https://careers.frisidea.com>.
- Configured and deployed servers for multiple projects, including designing an admin panel for a dating application.
- Created and integrated APIs to display dynamic data efficiently on the frontend, working closely with senior developers.
- Improved responsiveness and optimized layouts for non-optimized websites using Tailwind CSS, ensuring cross-device compatibility.

Personal News Portal Project - Freelance

Full-stack Web Developer

(December 2023 – February 2024)

- Design the web application interface using Figma.
- Developed the web structure using Laravel and tailwind.css
- Developed a local database using MySQL within laragon.
- Implemented main features for both users and administrators. Users can view trending categories, latest comments, recent posts, and perform searches by title. Additionally, they can sort posts by date or tag, and each post includes like and comment functionalities. Users can also embed videos into their blogs.
- Created an admin interface accessible only to editors and administrators. Editors have limited access, restricted to creating and editing features, and do not have access to user data.

House of Representatives Republic Indonesia – Jakarta, indonesia

Full-stack Android and web Developer Intern

(June 2023 – July 2023)

- Developed Android applications according to design specifications provided by the development team, utilizing Android Studio. Collaborated in building a web admin interface using CodeIgniter4.
- Restructured and optimized the PHPMyAdmin-driven admin view database, ensuring seamless functionality and improved performance.
- Constructed a robust CRUD API with CodeIgniter4, enhancing database connectivity and functionality for the Android-based attendance application.

Project Experience

Android Ordering App Development – University project

Android Developer

(May 2023 – May 2023)

- Designed the user interface of Ordering Application using Kotlin, leveraging various resource packages available in Android Studio.
- Managed and implemented the SQLite database for the Application to ensure efficient data management and retrieval.

Event Organizer Website Project – University project

Full-stack Developer

(May 2023 – May 2023)

- Developed a website with frontend and backend interfaces using HTML, CSS, and Bootstrap.

- Employed Codeigniter framework to facilitate database connectivity with PHP, delivering diverse backend functionalities tailored to distinct user roles. Admin had comprehensive CRUD privileges, while users enjoyed read-only access and event registration rights.
